

Average Price Contract

Add discipline and diversity to your grain marketing plan

The Average Price Contract at CHS helps to take some of the emotion out of making grain marketing decisions by utilizing a marketing tool that prices an equal volume of bushels each day during the specified pricing period. With this program, you'll specify the number of bushels along with your desired CHS delivery location, and enroll in the program by entering into a forward contract with CHS.

No bushel enrollment minimums. You can price any unpriced bushels at any time for an additional fee*, if you decide this is no longer the right fit for your marketing plan. All while utilizing the continued support of your experienced CHS grain marketing team.

Additional details

- When the pricing period ends, the futures price component of the contract price will be the average closing settlement price over the pricing period.
- Set basis separately prior to time of delivery.
- Producer can price any unpriced bushels at any time for an additional fee.*

Enrollment period

March 1 - April 25, 2025

Contact your CHS grain originator for further information on this program or to enroll bushels.

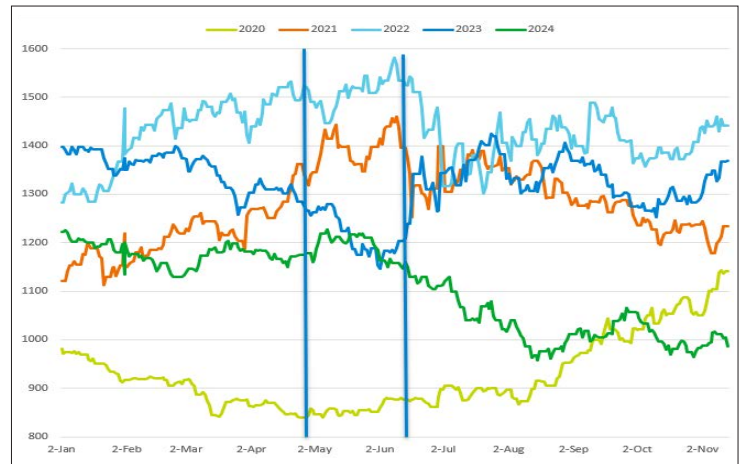

Entering into the Average Price Contract does not result in your opening of a futures/options account or having a futures/options position. This contract employs futures/options solely as a grain pricing mechanism. It is not a futures/options contract or a commodity pooling or trading arrangement.
